

*"Leading the **global** competition"*

*Istanbul | Florida*

## HIGH TEMPERATURE RESISTANT CONVEYING PART

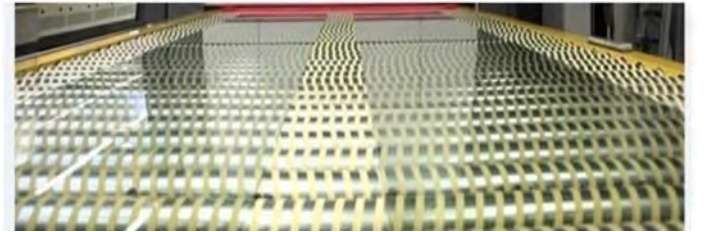

**EREM GLOBAL** is a group company specialized in designing, supplying and selling high temperature resistance felts and ropes, which are widely used in aluminum extrusion and glass tempering industries.

### Company Profile:

**EREM GLOBAL** was incorporated to share more than 20 years of experience with its business partners in order to provide a leading position in the international market and to play an active role. It has been operating in the fields of Import, Export, Agency, Distributorship, Raw Material Procurement Services and Commercial Law. It carries out its activities with three company subsidiaries as **EREM GLOBAL DIŞ TİCARET (Foreign commerce)**, **EREM GLOBAL LLC** and **EREM GLOBAL HUKUK (Legal services)** in Turkey and America.

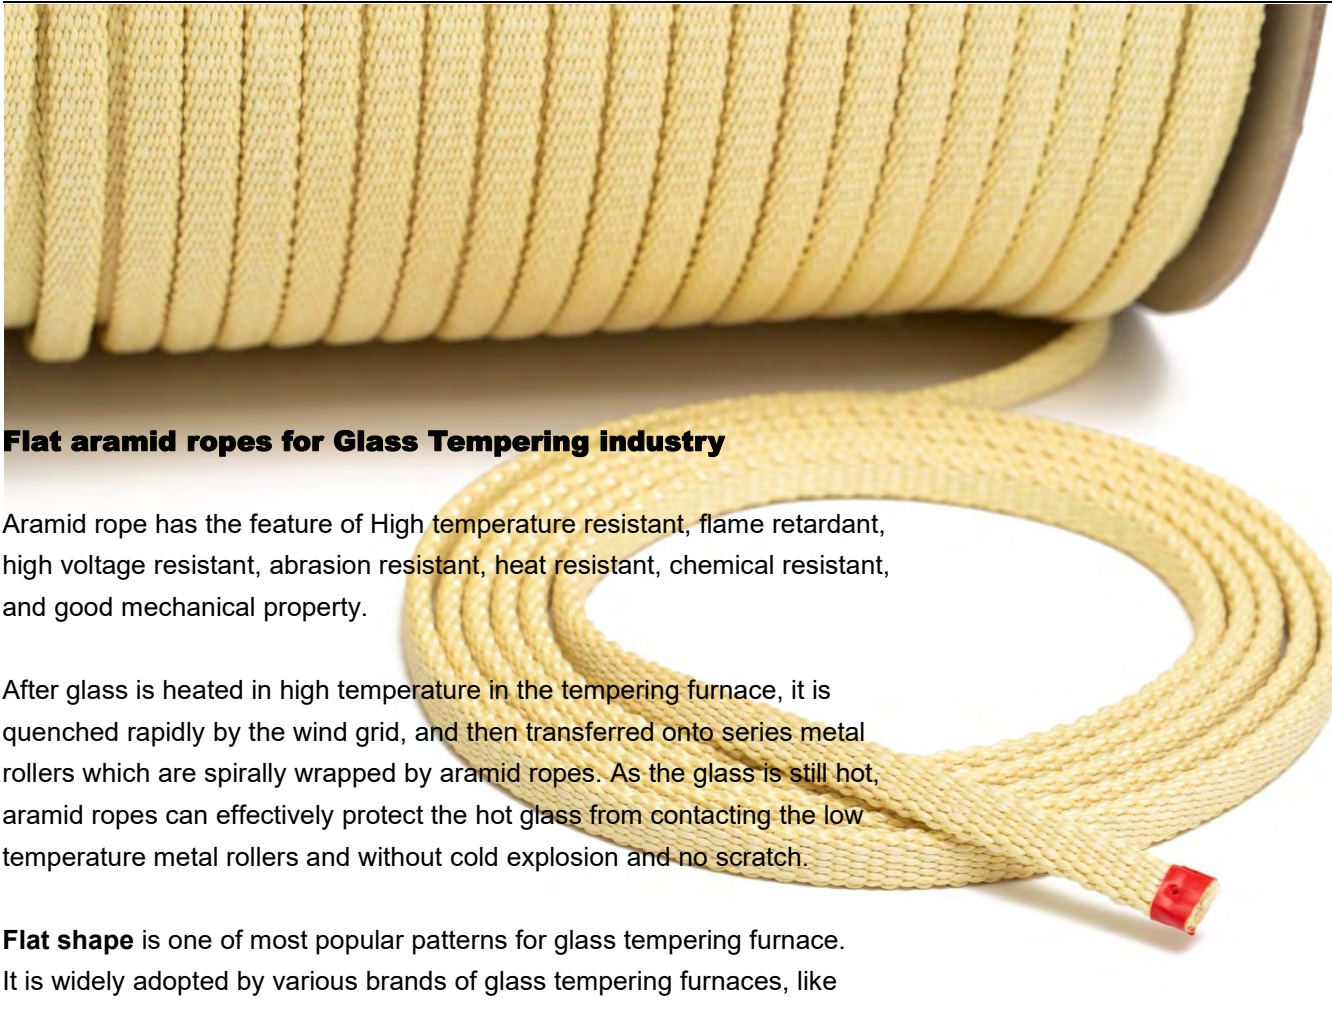

**EREM GLOBAL** has specialised primarily in architectural glazing, building and construction materials, interior and exterior solutions, spare parts, machinery and equipment and is developing its product range in other sectors day by day. In addition to these activities, it provides services in Foreign Trade with years of experience in import and export. With its wide network of agents and services, it has the necessary local knowledge and key global network to meet all business requirements. With a strong focus on meeting the needs, it supplies and markets many needed products in a complete way.

### Why should you prefer **EREM GLOBAL**?

- Global network of inter-country local knowledge and switches,
- Import and export experience to more than 200 countries,
- Fast and economical solutions with regional customs clearance and logistics agency network between countries,
- Boutique and project-based door-to-door deliveries in material and service supply,
- Import, export and logistics operation management,
- Uninterrupted and fast solutions in customs procedures,
- Sectoral Representation and Distributorship,
- Smooth and robust functioning in all business activities with specialised advice in the field of commercial law.
- Surveillance services on site,

### Flat aramid ropes for Glass Tempering industry

Aramid rope has the feature of High temperature resistant, flame retardant, high voltage resistant, abrasion resistant, heat resistant, chemical resistant, and good mechanical property.

After glass is heated in high temperature in the tempering furnace, it is quenched rapidly by the wind grid, and then transferred onto series metal rollers which are spirally wrapped by aramid ropes. As the glass is still hot, aramid ropes can effectively protect the hot glass from contacting the low temperature metal rollers and without cold explosion and no scratch.

**Flat shape** is one of most popular patterns for glass tempering furnace. It is widely adopted by various brands of glass tempering furnaces, like Glaston, Cooltemper, Northglass, Landglass, Tamglass, etc.

Our braided **flat aramid ropes** have been approved by many customers because good performance and our good service. Any question about aramid ropes, feel free to contact us.

Shape:	Flat
Working position:	Glass tempering furnace
Color:	Yellow
Material:	Para-aramid Yarn
Specifications:	8*1.5mm, 8*3mm, 8*4mm, 10*3mm, 10*3.5mm, 10*4mm, 12*3mm, 12*3.5mm, 12*4mm, 12*5.5mm
Package	Carton box

**Square aramid ropes for Glass Tempering industry**

Aramid rope has the feature of High temperature resistant, flame retardant, high voltage resistant, abrasion resistant, heat resistant, chemical resistant, and good mechanical property.

After glass is heated in high temperature in the tempering furnace, it is quenched rapidly by the wind grid, and then transferred onto series metal rollers which are spirally wrapped by aramid ropes. As the glass is still hot, aramid ropes can effectively protect the hot glass from contacting the low temperature metal rollers and without cold explosion and no scratch.

**Square shape** is also widely adopted by various brands of glass tempering furnaces. Our braided **square aramid ropes** have been approved by many customers because good performance and our good service. Any question about aramid ropes, feel free to contact us.

Shape:	Square
Working position:	Glass tempering furnace
Color:	Yellow
Material:	Para-aramid Yarn
Specifications:	4*4mm, 5*5mm, 5.5*5.5mm, 6*6mm, 10*10mm
Package	Carton box

### **Round aramid ropes for Glass Tempering industry**

Aramid rope has the feature of High temperature resistant, flame retardant, high voltage resistant, abrasion resistant, heat resistant, chemical resistant, and good mechanical property.

After glass is heated in high temperature in the tempering furnace, it is quenched rapidly by the wind grid, and then transferred onto series metal rollers which are spirally wrapped by aramid ropes. As the glass is still hot, aramid ropes can effectively protect the hot glass from contacting the low temperature metal rollers and without cold explosion and no scratch.

**Round shape** is not only adopted in glass tempering industry, but also many other suitable usages. Such as Kite market, climbing.....  
Our braided **round aramid ropes** have been approved by many customers because good performance and our good service.  
Any question about aramid ropes, feel free to contact us.

Shape:	Round
Working position:	Glass tempering furnace
Color:	Yellow
Material:	Para-aramid Yarn
Specifications:	From $\Phi$ 4mm to $\Phi$ 10mm
Package	Carton box

### **Aramid tapes**

Kevlar tape has the feature of High temperature resistant, flame retardant, high voltage resistant, abrasion resistant, heat resistant, chemical resistant, and good mechanical property. Can be used for various safety rope and handling, and other special purposes. Any question about aramid tapes, feel free to contact us.

Products:	Aramid tape
Working position:	Various safety protection and handling, and other special purposes.
Color:	Yellow
Material:	Para-aramid Yarn
Specifications:	Width from 20mm to 50mm Thickness from 1mm to 3mm
Package	Carton box

### **Para-aramid knitting tube**

Aramid knitting tube has superior property of heat resistance and wear resistance.  
So it is widely used to cover hot transfer roller or casing other materials.

Material:	Para-aramid Yarn
Color:	Yellow
Working position:	Glass tempering, casing other materials
Specifications:	ID from 10mm to 100mm
Package	Carton box

### **Aramid felt rings**

Products:	Aramid felt rings
Color:	Yellow
Material:	Para-aramid fiber
Specifications:	Inner diameter from 19mm to 168mm, manufactured by ordered size
Package	Carton box

### **Para-aramid arm protection sleeve with thumb slot**

Para-aramid have the property of heat resistance and abrasion resistance. Arm sleeves that are made of para-aramid yarn can protection your arms from hurt caused by welding spark, hot air, or touching other heat stuffs.

Material:	Para-aramid Yarn
Color:	Yellow
Working position:	Arm's protection
Specifications:	18 inch length, 22 inch length
Package	Carton box
